To whom it concern,

In the last two years I have seen politicians call to defund the police. I have watched crime sky rocket. Courts and prosecutors releasing criminals back on society. At a time when people see they must be the ones to protect themselves. Do our lawmakers make courts put the lawbreakers in jail with stiff jail penalties. No they put out more laws on law abiding citizens. You call an end to gun violence because you figure it an easy fix ban guns and you can go home and say we fixed it we did something. The truth is there is no such thing as gun violence problem. A gun is a tool it is the user that makes it dangerous. The real problem is human violence. That is a problem that has been getting worse. Yet no one wants to talk about the gangs the metal Heath issues and the flood of people that have already broken the laws by coming here illegally. Stop taking our rights away no more no new gun laws. There are plenty on the books how about prosecuting any one who commits a crime is prosecuted to the fullest extent of the law. Thank you for your time.
